📍 Belgrade, Serbia

📅 1998/08/02

🇷🇸 Serbian

Profile

Student of Software Engineering highly motivated to learn about the field of management in tech companies.

Education

2017 – present Belgrade, Serbia	Bachelor of Software Engineering <i>School of Electrical Engineering, University of Belgrade</i> 🔗
------------------------------------	--

Projects

2020	Daljinac 🔗 <i>Project for University class Principles of Software Engineering</i> Part of a team of 3 other peers, creating a Web Application for controlling your AC remotely, over the Internet using an Arduino. Focused on the frontend with Vue.js.
2020	Intelligent Shopping Assistant - ISA 🔗 <i>Project for University class Software Project Management</i> Led a team of 1 more peer, creating a mock project for the Horizon 2020 🔗 (EU Research and Innovation programme) which was based around the idea of making grocery shopping "smarter" - similar to Amazon Go. Worked on an entire process of an actual application for the Horizon 2020 program, including project proposition (MS Word), project plan (MS Project), business plan (MS Excel), budget plan (MS Excel), project presentation (MS PowerPoint), project prototype implementation (JavaScript, HTML, CSS), user manual and marketing strategy.
